The connector in the air will be active. The door to the star will open. Mount him near the tower with the star in the middle of the place. Use the previously prepared connector. B7walk with the hexahedron. First you should solve the level of the shot on the moon, the connector in that place will be in the air. However, if vitamin B2 deficiency occurs, symptoms such as sore throat, mouth wounds or lips, hair loss; and / or cutic disturbances may occur. In the location of Big Lump of Mine walks with the hexahedron outside the level limits, moving in the balls. First, at the level behind the iron curtain put two hexahedros to build stairs through which you will get to the wall on the right side. And when everything else fails, it can be taken as a dietary supplement. In other cases, vitamin B2 is added to certain products. To ensure the highest riboflavin level, store your food (especially those mentioned above) in opaque containers and keep them far from any light source. B2HIDDEN passage. Then go through the tomb level while dragging the packaging and two connectors found deeper from that place to the beginning. Riboflavina also helps keep your system nervous and immunological system working properly. Connect the point connector shown in the figure with the next star tower. Riboflavin not used passes out of the body in the urine. With the help of available devices, open the door before the star .star.
